

9.3 Management Review

A management review is a meeting led by top management to review the effectiveness of ISMS in your organisation. This meeting shall be conducted regularly.

The agenda to be discussed includes inputs that are outlined in the standard such as:

- Follow-up actions after previous meeting - Have they been taken? Are there issues to note?
- Issues that would require changes to be made to ISMS - Are there emergency situations to prepare for?
- Feedback from interested parties - Have interested parties' feedback been well managed?
- Outcome of risk assessment
- Status of the risk treatment plan
- Resources required to support an effective ISMS - Are current resources sufficient?
